EXPERIENCE

12/2021 - 07/2022 - London, United Kingdom

Research Assistant in Economics (Internship)
King's College London | kcl.ac.uk

I assisted and performed in data collection, cleaning, text and data analysis and economic analysis by using the programming language Python. I primarily engaged in assembling new datasets, which included tasks such as digitising primary data sources and collecting data from publicly available data directories. I pre-processed these data before the economic analysis. I also performed descriptive economic analysis using data and produced preliminary results in tabular or graphical format.

07/2017 - 08/2017 - Gaziantep, Turkey

Sales Representative (Internship)
Fiat Professional | topcuoglu.fiatbayi.com.tr

I took on several tasks at the work placement. Firstly, I utilised the marketing department to reach out to former and new customers, managed orders in progress and developed contracts with many business departments to support sales. I also conducted an analysis to better understand Fiat's competitors and their advantages.

08/04/2017 - Bursa, Turkey

Moderator
Üreten Türkiye Konuşuyor: Bursa

I participated in the "Üreten Türkiye Konuşuyor: Bursa" economic meeting and acted as a moderator. The esteemed meeting aimed to reveal the issues of Turkey's producers and offer solutions to these issues. Next, we tackled these issues with businesspeople from various sectors of the Turkish industry to overcome them. I, therefore, had the opportunity to obtain in-depth knowledge of current economic issues and solutions.
